Building a Greener Childhood

We create sustainable, joyful play experiences that match the pace of childhood

Today's parents want their kids to grow, learn, and thrive **without harming the planet**

ToyCycle was founded by a mother and her team who believe toys should **fuel imagination – not fill landfills**

Toys - A Hidden Sustainability Crisis

Most toys are designed for short life cycles and one of the least recycled consumer items globally

The average American child receives upwards of **70 new toys per year**

90%

Roughly **90% of all children's toys are made at least partly from plastic**

6%

Worldwide, toys make up **6 percent of all landfill plastics**

Toys are one of the most plastic-intensive consumer product categories in the world

Continuing the toy journey

Stepping away from single-use playthings

Centered on the **most toy-intensive stage**: 1-3 years, where development happens fastest and toys are frequently outgrown and forgotten

Providing sustainable options for gift-givers and **removing the guilt** from gift disposers

Ensuring that toys that have hardly been touched but are now yesterday's story either go on to **brighten another life** or to **feed the planet**

Getting the word out

Our customer acquisition strategy

		Lifetime purchase amount ($/customer)	Associated acquisition cost ($/customer)
01	**Initial phase testing and iteration** 50 users @ 5-6 purchases	$39.16	$0
02	**Kickstarter campaign:** Proof of market +200 users @ 1-2 purchases	$10.68	$5
03	**Online forums/SEO/GoogleAds:** advertising +350 users @ 1 purchase	$7.12	$3
04	**Instagram/TikTok shop and social ad spend** +400 users @ 2 purchase	$14.24	$15
05	**Referrals and word-of-mouth** +100 users @ 3-4 purchases	$24.92	$0
	Avg. Customer Lifetime Value (LTV) / Avg. Customer Acquisition Cost (CAC)	$13.43 ÷	$7.32
		1.83x

Team

A mother and her team who believe toys should fuel imagination – not fill landfills

Nurşen
Ogutveren

- Experienced **software engineer** and **biologist**
- Guilt-ridden **mom** of an easily distracted 4-year-old superhero

Matt
Asquith

- Experienced **consumer marketer** and **communications** professional
- Former **tricycle rider**

Gai
Sawant

- Experience with **scaling infrastructure**, **optimizing operations**, & product innovation
- Former cloud architect; current **toy composting evangelist**

Max
Netzband

- Extensive experience in **sustainability & circularity consulting**
- **Consulted 10+ startups** on market entry strategy

Operations and unit economics

Product | Rattle		Development Stage		
		Pilot Phase	Growth Phase	At Scale
	Descriptions	*100 units*	*1,000 units*	*5,000 units*
PHA Material	*Retail PHA filament ($25/kg), ~25g per rattle*	$0.63	$0.5	$0.45
3D Printing (Batch)	*Outsourced to print farm, assuming batch of 6 per bed*	$2.0	$1.5	$1.25
Packaging	*EcoEnclose mailer + insert + sticker*	$1.5	$1.0	$0.75
Assembly	*Manual labor ~10–12 units/hour*	$1.75	$1.25	$1.0
Shipping & Fulfillment	*USPS First-Class under 8 oz via PirateShip*	$5.0	$4.5	$4.0
	COGS	**∑ $10.88**	**∑ $8.75**	**∑ $7.45**
	Price charged per toy	**$18.00**		**$22.00**
	Gross Margin	**40%**		**66%**
